

To whom it may concern

My name is Gugulethu Kunene, I am an Information Technology in Software Development graduate, obtained at the Tshwane University of Technology. I am highly interested in broadening my knowledge and skills in Cloud Computing and Software Engineering. Software development is becoming a key factor in driving key business industries from Startups to Enterprise organizations.

Software Development is a fast-growing skill and I chose this course because I am passionate about coding and innovation. It simplifies the way we do things and solves our day to day challenges and requires a continuous learning. I strongly believe that I deserve this opportunity due to my capabilities, strengths and my hunger for success.

I am a young ambitious person, failure does not keep me down, I see it as a learning process. I possess the following skills: I have exceptional communication and strong team participation, willingness to take on opportunities, problem solving mentality and accountability for commitments, delivery, results and quality.

I know various methodologies of building applications such as Agile development, DevOps deployment and Waterfall development to name a few, I learned these methodologies as I was doing my research projects and assignments. Furthermore, I have the ability to gather information and analyze it to detect problems and create potential solutions.

And recently I have acquired new skills at Standard Bank South Africa such as Cloud Computing, Chef (Configuration tool) and Terraform (Which is an infrastructure as Code language), OpenShift Containerization and BMC Remedy IT Service Management in which I helped teams with Azure issues (Access, errors or deployments).

Should I be given a chance to join your team, I declare that I will be proactive, a great team member and I will work hard and apply my skills and knowledge on any task that will be given to me, while maintaining confidentiality and adhering and abiding by the policies of the organization. I would appreciate the opportunity to further discuss my unique attributes, my leadership skills and other qualities that i possess. I look forward to hearing from you.

Yours Sincerely

Gugulethu Kunene
